

## MULTICYCLONE ULTRA CENTRIFUGAL WATER FILTRATION

### MULTICYCLONE FILTER

Part No.	Product Description	Nom. Size	Price
200383	MultiCyclone Ultra MC16 (75) c/w Cartridge	2" / 63mm	POA
200382	MultiCyclone Ultra MC12 (75) c/w Cartridge	1½" / 50mm	POA

For base stands please see page 23

- Imperial / Metric quick fit unions
- Pressure gauge
- Hydraulically efficient design
- Glass filled thermoplastic
- 75ft<sup>2</sup> pleated filter cartridge
- 12 / 16 hydrocyclones
- Clear poly carbonate sediment chamber
- 1" / 32mm purge valve

The MultiCyclone Ultra has all the benefits of the ever popular MultiCyclone with the addition of a 75ft<sup>2</sup> cartridge filter located in the upper housing. Incoming water enters the hydrocyclones tangentially, generating a strong centrifugal effect. The sediment particles are then spun out to the hydro cyclone's wall, and spiral down into the sediment chamber. The filtered water then migrates towards the centre of the hydro cyclone where the water reverses and spirals upwards and through a 75ft<sup>2</sup> cartridge element before exiting the MultiCyclone Plus. The addition of the cartridge element provides the highest standard of filtration possible with very little need for cleaning. The majority of the sediment is removed by the hydrocyclones. The sediment level can be visually monitored through the MultiCyclones clear sediment bowl. The pressure gauge located at the top of the unit indicates when the cartridge requires cleaning. The cartridge can easily be removed by undoing the locking ring.
